NEW On-Demand courses for health care professionals

Gender Affirming Care Modules

Transgender and gender diverse (TGD) patients often face inaccessible care and bias when seeking medical assistance resulting in a high prevalence of poor health outcomes.

It is essential to understand TGD patients' unique needs as they face healthcare disparities. Rush University Medical Center's new Gender Affirming Care courses are comprised of three modules that will discuss gender-affirming strategies and treatment options, as well as the utilization of the gender dysphoria diagnosis in today's healthcare system, to help clinicians treat TGD patients more effectively. Participants earn up to 1.5 CME credits.*

Featured modules include:

- Introduction to Trans-Affirming Care
- The Gender Dysphoria Diagnosis and Gender-Affirming Mental Health Care
- Gender-Affirming Care: Medical Management
